Package: powerbrmsINLA (via r-universe)

June 3, 2026

Title Bayesian Power Analysis Using 'brms' and 'INLA'

Version 1.2.0

Maintainer Tony Myers <admyers@aol.com>

Description Provides tools for Bayesian power analysis and assurance calculations using the statistical frameworks of 'brms' and 'INLA'. Includes simulation-based approaches, support for multiple decision rules (direction, threshold, ROPE), sequential designs, and visualisation helpers. Methods are based on Kruschke (2014, ISBN:9780124058880) ``Doing Bayesian Data Analysis: A Tutorial with R, JAGS, and Stan'', O'Hagan & Stevens (2001) <doi:10.1177/0272989X0102100307> ``Bayesian Assessment of Sample Size for Clinical Trials of Cost-Effectiveness'', Kruschke (2018) <doi:10.1177/2515245918771304> ``Rejecting or Accepting Parameter Values in Bayesian Estimation'', Rue et al. (2009) <doi:10.1111/j.1467-9868.2008.00700.x> ``Approximate Bayesian inference for latent Gaussian models by using integrated nested Laplace approximations'', and Bürkner (2017) <doi:10.18637/jss.v080.i01> ``brms: An R Package for Bayesian Multilevel Models using Stan''.
